

INTERNATIONAL AMATEUR RADIO UNION

REGION THREE

MONITORING SYSTEM REPORT

September 2012

Peter Young VK3MV

Reports for September were received from ARSI, JARL, NZART, and the WIA.

This month there were 1103 observations made across the Region, as compared to last month of 1073.

Congratulations to John VK4TJ, who logged 500 observations this month. A really mammoth amount of work.

This month there is an increase in the number of intrusions in the higher frequency bands, particularly from OHR Radars on 15 meters. Some OHR emissions into northern Australia are very strong and a report has been filed with the Australian Regulator, seeking information and their removal. With propagation on the improve there are more detection of intrusions on 10 meters from low power commercial like services.

Again this month, further reports of " HF Man Packs" emissions are being logged, but due to the random nature of these emissions a possible location source is difficult to determine. Further reports are requested to determine a location. See the details of frequencies and times listed below.

The Burmese broadcast station operating on 7110 kHz, is still operational and has been reported to the Australian Regulator.

Thank you to all the regional observers for their reports, these reports are vital and are really appreciated. Keep them coming.

For those who would like a CSV file of data please email me at: vk3mv@wia.org.au
